

Agile Business Analysis (AgileBA[®]) Certification

PROJECT, PROGRAMME & PORTFOLIO

In Partnership With

Master the role of Agile Business Analyst with AgileBA training and certification

Business Analysts play a crucial role in projects, through analysis of the organization's needs and the alignment of business projects to those needs.

Introducing an agile approach has a significant impact on the role of the Business Analyst, on their existing skills and their way of working. Whilst traditional skills are still valuable, new skills and ways of working need to be adopted to harness the benefits of a new way of working and to appreciate the different relationships with co-workers and stakeholders.

AgileBA guidance offers useful, practical and comprehensive guidance on the role of the Business Analyst working in an agile way (the Agile Business Analyst).

Based on the Agile Business Consortium's well-established Agile Project Framework, the guidance gives context to the Business Analyst role beyond the individual project, in relation to organizational mission and strategy, and provides additional depth and guidance for the Business Analyst role.

Training and certification enables business analysis professionals to develop their understanding and proficiency in adopting and applying the AgileBA guidance, providing:

- ▶ Knowledge and understanding of the AgileBA role and responsibilities;
- ▶ Context to the role beyond the individual project, in relation to organizational mission and strategy;
- ▶ Additional depth, guidance and techniques for the Business Analyst role.

Approved training courses are available globally via APMG's global network of accredited training providers.

Further Information
