

Public Private Partnerships Preparation

PUBLIC PRIVATE PARTNERSHIPS TRAINING

COURSE OVERVIEW

The purpose of the Public Private Partnerships Preparation certification is to confirm whether the candidate has achieved sufficient understanding of the importance and general content of a PPP Framework and application of PPP Project Identification, Screening, Appraisal and Preparation Processes in a given governmental context. A successful Preparation candidate should, with suitable direction and as part of a multidisciplinary team, be able to start applying and tailoring PPP projects in a given governmental context, but may not be sufficiently skilled to do this appropriately for all situations. This is the primary outcome from the Public Private Partnerships Preparation certification.

The Public Private Partnerships Preparation Course and Examination are based on Chapters 2-5 of the PPP Guide. This is a practitioner level certification – aimed at people involved in either developing or implementing PPP frameworks and in the initiation or implementation of PPP projects. Candidates must have already passed the Foundation exam to be eligible to sit the Preparation exam.

TARGET AUDIENCE

This is a professional-level certification - aimed at people involved in the development or implementation of PPP structures and at the beginning or implementation of PPP projects. Suitable functions include:

- Public sector employees
- Professionals and their advisers or consultants
- Private sector roles, such as developers, contractors, investors and financiers

LEARNING OBJECTIVES

The candidate that completes the Public Private Partnerships Preparation training should be able to demonstrate understanding of how to apply and tailor the established procedures, roles and institutional responsibilities that determine how the government selects, implements and manages PPP projects, as outlined in the PPP Guide:

- Offer relevant insights in discussions about the value and importance of having a PPP Framework, its objectives and scope, and what it should include.
- Recognize ways to establish a PPP Framework in different jurisdictions, taking account of existing legal and administrative traditions, and offer alternative approaches.
- Use an understanding of how the Framework guides each stage of a typical PPP Process to propose and evaluate its application to a given governmental context.
- Help to define a strategy for market testing, observing the key aspects of the Process relevant to its success, whilst giving consideration to the strategic issues involved (including transparency and governance).

COURSE SUMMARY

Certificate:

Public Private Partnerships Preparation

Course Format:

Classroom, Virtual or Self-Paced

Course Duration:

Classroom: 5 days

Virtual: 5 days (2x2-hours a day)
