

COBIT® 2019

IT Governance Framework

Command the contemporary IT Governance framework

COBIT® 2019

IT GOVERNANCE & SERVICE

In Partnership With

ISACA®

Ensure effective enterprise governance of information & technology with COBIT[®] 2019 training & certification.

Effective enterprise governance provides a structure for I&T strategy with business strategy.

This program takes stakeholders' interests into account, as well as the needs of staff and the processes they follow and offers tailorable solutions for implementation.

COBIT[®] recognises that information and technology governance is an integral part of overall enterprise governance.

COBIT[®] 2019 is the latest version of the globally recognized COBIT Framework, the leader in ensuring effective and strategic enterprise governance of information and technology.

The COBIT[®] 2019 framework is underpinned by six governance systems principles:

1. Provide Stakeholder Value: Each enterprise needs a governance system to satisfy stakeholder needs and to generate value from the use of I&T.
2. Holistic Approach: A governance system for enterprise I&T is built from a number of components that can be of different types and that work together in a holistic way.
3. Dynamic Governance System: A governance system should be dynamic. This means that each time one or more of the design factors are changed the impact of these changes on the EGIT system must be considered.
4. Governance Distinct From Management: A governance system should clearly distinguish between governance and management activities and structures.
5. Tailored to Enterprise Needs: A governance system should be tailored to the enterprise's needs, using a set of design factors as parameters to customize and prioritize the governance system components.
6. End-to-End Governance System: A governance system should cover the enterprise end to end, focusing not only on the IT function but on all technology and information processing the enterprise puts in place to achieve its goals.

Further Information

Who is it for?
